

# PDR RID Report

**Date Last Modified** 6/20/95

**Originator** Kevin Schaefer

**Phone No** 202-358-0755

**Organization** NASA HQ

**E Mail Address** kschaef@mtpe.hq.nasa.gov

**Document** Data Migration

**RID ID** PDR 424

**Review** SDPS

**Originator Ref**

**Priority** 2

**Section**

**Page**

**Figure Table**

**Category Name** V0 Data Migration

**Actionee** HAIS

**Sub Category**

**Subject** Need clear definition of migration

## **Description of Problem or Suggestion:**

The ECS must clearly define data migration in all of its presentations, documents, and DMPs.

## **Originator's Recommendation**

Clearly state that data migration moves data from systems we cannot (or choose not to) maintain to protect the data and improve services. Place this definition in the appropriate documents.

## **GSFC Response by:**

## **GSFC Response Date**

**HAIS Response by:** Suhrstedt

**HAIS Schedule** 5/22/95

**HAIS R. E.** Doplick

**HAIS Response Date** 5/16/95

The following wording will be included in future ECS documents related to V0-to-V1 data migration such as the Missions Operations Concept Document and the Version 1 Data Migration Plan.

"Because of the value of past remote sensing data to Global Change Research, NASA has elected to migrate Version 0 data to ECS as part of the overall Version 0-to-Version 1 transition. ECS is being designed for a long life cycle (at least two decades beyond the launch of the first EOS spacecraft) with architectural features that facilitate technology upgrades and evolution. Migration to ECS will ensure continued maintenance of these important historical Earth science data. After migration, ECS will provide information management and data archive and distribution functions for past NASA Earth science flight missions and other Earth science data held by NASA. Users will gain access to improved services, new functions, and better performance. Version 0-to-Version 1 migration is being planned from a users' point of view to ensure continuous data availability throughout the migration process."
